

Heavy Metal from Sweden

As sponsor of this year's Wacken Open Air Festival, Volvo Trucks has launched the special "Swedish Metal" edition of the FH. The all-black tractor unit is limited to 66 vehicles, with a choice of drive. The electric versions additionally bear the number "666" on the driver's cab as an indication of the horsepower.

All Volvo FH Swedish Metal are painted black and are decorated with gold lightning and emblems. On the side panels there is a silhouette of a Volvo FH with bull horns. Other features include a deep sun visor, deep front spoiler with two yellow lights incorporated underneath and an illuminated roof sign, as well as round LED headlights. (aum)
