

The 500th Hyundai Kona Electric for Coca Cola

Hyundai has handed over the 500th Kona Electric to Cocoa-Cola Germany. The drinks company had announced in 2021 that it would convert all cars and vans in its own fleet in Germany to electric vehicles by 2025 when the respective lease ends. Of the current total of 1786 cars and vans, 762 now run on electricity. The 500 Kona electric vehicles are used by sales advisors and key account managers, among others. The two companies have been working together since 2021. (aum)
