

## The dark side of the Range Rover Sport

Range Rover offers the "Stealth Pack" for the Sport, which gives the SUV a dark touch. The silk-matt exterior film in Carpathian Grey with body details in glossy Narvik Black is only available for the Dynamic SE. Other features include 23-inch wheels with five double spokes and a glossy black finish, black brake callipers, dark tinted windows from the B-pillar upwards and a glossy black contrast paint finish for the roof. In the interior, customers can choose between perforated Windsor leather seat covers in Ebony or Light Cloud.

The €11,550 Stealth Pack is initially available for the six-cylinder diesel engines and later also for the plug-in hybrids. The satin film is applied during vehicle production and also protects the bodywork from minor scratches. It can also be easily removed and replaced.
