## The MG 3 Hybrid Plus starts at 19,990 euros

Most recently, MG has only launched new electric cars. With the Model 3 Hybrid Plus, a full hybrid is now coming onto the market at the end of May and can be pre-ordered with immediate effect. With prices starting at 19,990 euros, the small car will be the entry-level model in future. Three equipment variants are available.

Among other things, the MG 3 Hybrid Plus has a seven-inch instrument display and a 10.25-inch color touchscreen for infotainment including Android Auto and Apple Carplay. Depending on the measuring method, the trunk capacity is 241 liters in the block knife mode or 293 liters, with the seat bench folded down it is up to 983 liters.

The MG 3 Hybrid Plus combines a 102 hp (75 kW) 1.5-liter petrol engine with a 100 kW (136 hp) electric motor. This adds up to a system output of 195 hp (143 kW). Standard fuel consumption is stated as 4.4 liters per 100 kilometers. Power is transmitted by a three-speed automatic transmission. Other features on board include Forward Collision Alert and Lane Keeping Assist, ACC, intelligent high beam control and a reversing camera with dynamic guidance lines.

The Comfort trim level (from €21,490) also offers a rear window wiper, automatically folding and heated exterior mirrors, rear air vents, two additional loudspeakers and a start button as well as 16-inch alloy wheels. The Luxury also comes with a rain sensor, blind spot warning, lane departure warning and rear cross-traffic alert. Other features of the top model, which is available from €23,990, include privacy glass from the B-pillar, microfiber leather steering wheel, keyless entry system, heated partial leather seats at the front and heated steering wheel.
