

Noble Stromer meets luxury furniture

Lancia is also represented at Milan Design Week, which opens tomorrow - albeit only indirectly. Together with Cassina, one of the most renowned manufacturers of Italian luxury furniture, the special model Lancia Ypsilon Cassina was created, which will be part of the exhibition of the Bredaquaranta design chain. The first fully electric vehicle from the resurrected Italian luxury brand can be seen in a showroom dedicated to Cassina's luxury furniture in Milan's historic Brera district. (aum)
