

Preview: SUVs as far as the eye can see this week

Next week, we will be presenting the new Dacia Duster. The SUV from Romania has a completely new design, better equipment and is also a good choice off-road, as Walther Wuttke discovered after his first contact with it. Our author will also be there when Kia presents its new EV3 entry-level electric model to the public for the first time.

The revised Mitsubishi ASX crossover SUV, which Frank Wald was able to inspect in advance, and the new Opel Grandland will also celebrate their static premiere. Michael Kirchberger will be there on April 23 when the party takes place where the SUV will be built: At the renovated Eisenach plant. At the end of the week, there will also be an overview of Nissan's light commercial vehicles.

As usual, we will also keep you up to date with further news from the world of cars, motorcycles and transport policy. (aum)
