

## **Nissan Interstar: A star for all occasions**

Von Walther Wuttke

Nissan completes its van range with the Interstar. Derived from the Renault Master, the light commercial vehicle is being launched with diesel and electric engines. Thanks to optimized aerodynamics, fuel consumption has been reduced by 20 percent compared to its predecessor. With a warranty of five years or 160,000 kilometers, Nissan is the leader in this segment. Thanks to a network of partners, the van can be converted or extended for numerous purposes. (aum)
